

You will need

1. An Android handset with the latest OS install
 - If you are unable to update to the latest Android OS, your device will not work with VR.
2. Google Cardboard VR headset / other vr box
3. Google Chrome Android web browser

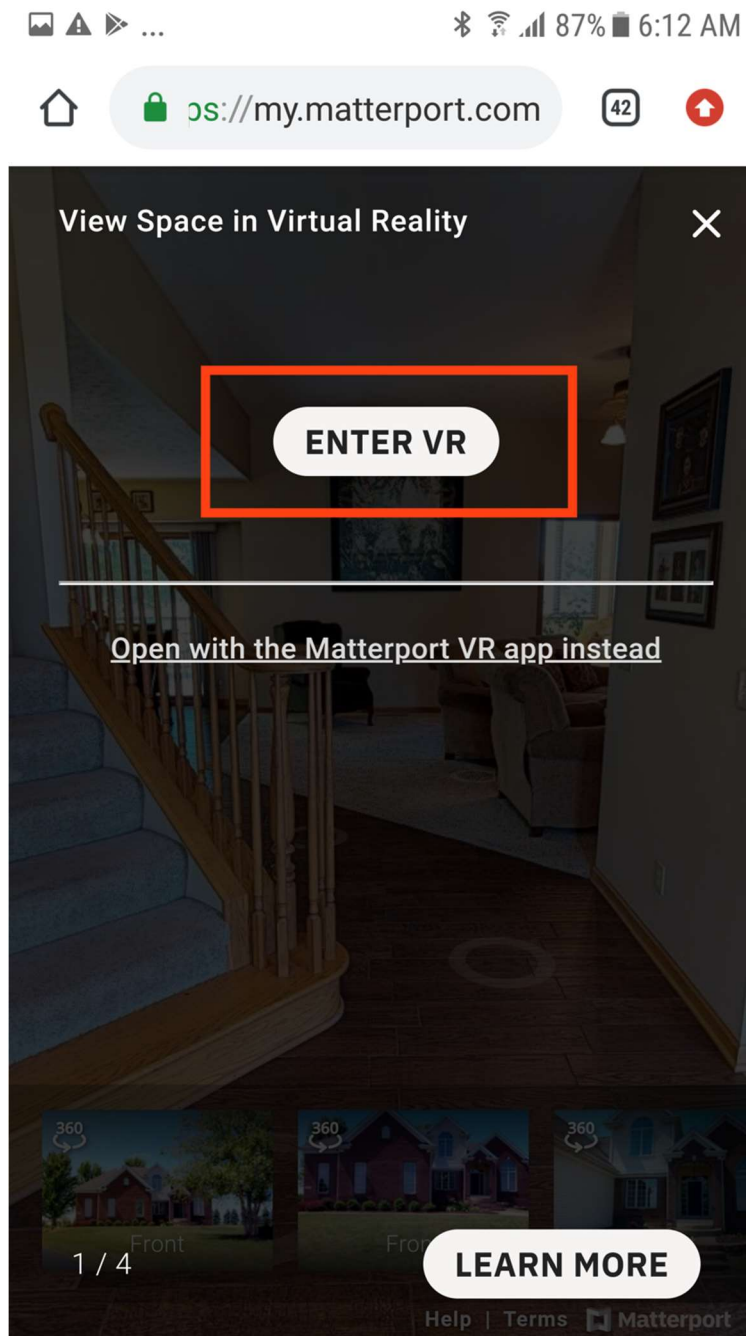

Instructions

1. Download and install the latest version of **Google Chrome** for Android from the Google Play Store
2. Open Google Chrome
3. Open the space on your website

4. Select the VR icon

5. In the menu that appears, tap the **Enter**

VR button

6. Horizontally orient your phone (**with the volume buttons pointed at the floor**), and place it into Google Cardboard's folding compartment

- Secure the phone in place with the velcro clasp on top of the headset

7. While inside the VR, look in all directions to view the space
8. Anchor your selection icon at the blue hotspots to move through the space

- You will need to keep your selection circle fixed on the hotspots until they become green.

9. To exit the model, remove the phone from the Google Cardboard headset and tap on the **X icon** at the top left of the screen
